

12th SSBP International Research Symposium

Listening to genetic disorders: from molecules to management

14th – 15th October 2009, Cambridge, UK

The SSBP is pleased to announce that the 12th SSBP International Research Symposium will be held at Corpus Christi College, Cambridge, UK.

Symposium themes include molecular aspects of neurocognition and behaviour, animal models of human learning and behaviour, infant and brain development and neuropsychological and social-communication skills in genetic syndromes.

Keynote speakers include Brendan Manning (Harvard), Alcino Silva (UCLA), Pierre Roubertoux (Marseille), Mustafa Sahin (Harvard), Ayla Humphrey (Cambridge) and Annette Karmiloff-Smith (London).

For more information and details of how to submit an abstract for an oral or poster presentation, visit www.ssbpconference.org.

The symposium is sponsored by the Tuberous Sclerosis Alliance.

The SSBP is a registered charity (No. 1013849). Picture courtesy Corpus Christi.
